DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see Remarks, filed 5/12/06, with respect to the rejection(s) of claim(s) 1-40 under 35 U.S.C. 102(b) have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Launey et al. U.S. Patent 5,086,385.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-40 are rejected under 35 U.S.C. 102(b) as being anticipated by Launey et al. U.S. Patent 5,086,385. Regarding claims 1 and 40, Launey discloses a method of accessing a schedule on a controller coupled to a user interface (col. 3, lines 39-43), comprising the steps of: initiating a schedule review mode within the controller (col. 15, lines 59-65), said schedule review mode permitting read-only access to at least one schedule parameter in the schedule (col. 18, lines 37-44); displaying one or more schedule parameters for at least one period on the user interface (col. 16, lines 24-34); and exiting the schedule review mode (col. 17, lines 6-11). The Office interprets "status information" as read-only data (col. 18, lines 37-44).

Regarding claims 2-5, 13-16, and 26-29, Launey discloses the method of claim 1, further comprising the steps of: initiating an editing mode within the controller (col. 13, lines 47-68);

and modifying at least one schedule parameter of the schedule (col. 14, lines 1-12). Launey discloses the method of claim 2, wherein the step of initiating the schedule review mode occurs prior to the step of initiating the editing mode (col. 16, lines 24-39). Launey discloses the method of claim 1, wherein said at least one period includes a wake period, leave period, return period, and sleep period (col. 17, lines 6-11). Launey discloses the method of claim 1, wherein said one or more schedule parameters is selected from the group consisting of an event time parameter, a heat set point parameter, a cool set point parameter, a fan mode parameter, and a humidity level parameter (col. 12, lines 34-46).

Regarding claims 6-8, 17-19, and 30-32, Launey discloses the method of claim 1, wherein the user interface comprises a touch screen (col. 15, lines 59-65), display panel and keypad (col. 18, lines 58-64), and a menu-driven interface (col. 17, lines 6-11). Regarding claims 9-12, 20-23, and 33, Launey discloses the method of claim 1, wherein said schedule is a heating, cooling, or venting schedule, and the controller is a HVAC controller (col. 24, lines 21-29). Regarding claims 24 and 38, Launey discloses the method of claim 13, wherein said one or more schedule parameters are unmodifiable in the schedule review mode (col. 18, lines 37-44).

Regarding claims 25 and 39, Launey discloses a programmable controller for use in controlling a system, the controller comprising: a user interface (col. 3, lines 39-43); and a processor configured to run a scheduling routine for modifying a schedule, the scheduling routine including a separate schedule review mode and editing mode (col. 38, lines 3-15); wherein the schedule review mode is configured to permit the user to display one or more schedule parameters on the user interface without allowing the user to modify at least one of the schedule parameters without first initiating the editing mode (col. 38, lines 3-15). The Office

Art Unit: 2125

interprets the “current security floor plan” as the schedule review mode and the mode when the password is entered as the editing mode. Regarding claims 34-37, Launey discloses the controller of claim 25, wherein said system is a security, lighting (col. 24, lines 21-29), sprinkler (col. 12, lines 34-40), or A/V system (col. 24, lines 21-29).
